

PIPEWORK ENGINEERING SERVICES
LIMITED

A comprehensive pipework prefabrication service

Whatever your pipework requirements **WE CAN DELIVER**

Established in 1982, Pipework Engineering Services has earned an enviable reputation for quality and reliability amongst its expanding customer base.

The reason? We know that our customers don't just look to us to supply pipework. They rely on us for our industry knowledge and our willingness to go the extra mile to meet their requirements, and

trust us to deliver the best quality product on time and at a competitive price.

As one of the leading fabricators of carbon steel and stainless steel pipework, PES can offer an unbeatable service to industry across the board – from fire protection to building services and from water to process engineering.

TALK TO THE EXPERTS....

Using PES to manufacture your pipework provides a cost effective solution from a single source of supply. It reduces the need to use expensive site labour and management resource. The pipework is manufactured within purpose built and managed environments minimising defects and delays through improved quality control. Key dates are more readily achieved in today's fast track culture with deliveries being made in accordance with pre-agreed programmes. The solid working relationship our customers enjoy with PES makes it easy to work together to achieve the best results.

... TRUST OUR EXPERIENCE

Pipework Engineering Services has worked for some of the UK's best-known names, in some of the most prestigious locations. With particular experience in the fire protection and building mechanical services sectors, our expertise is equally applicable to most industrial and commercial applications — and our approach to business will be appreciated by all who place first class customer service high on their list of requirements.

WHERE QUALITY COMES FIRST

Our primary objective is to provide a quality product to satisfy your particular needs. Detailed inspections are carried out at every stage of the production process to ensure that your specifications and requirements are met. Accreditation to BS EN ISO 9001:2008 is an independent endorsement of the company's commitment to quality.

LOCATIONS AND FACILITIES

PES CAPABILITIES

- Fabrication of carbon steel and stainless steel pipework up to 600mm diameter
- Welding to BS2633 (Class I), ASME IX or BS2971 (Class II). All welders are qualified in accordance with BS EN 287
- Welding processes: STT, MIG/MAG, MMA and TIG
- Non-destructive testing by arrangement
- Pipe threading facilities up to 100NB
- Roll grooving from 25NB to 500NB
- Surface protection: Shot blasting, painting, hot dip galvanising, powder coating, fusion bonded epoxy coating etc.
- Quality control to BS EN ISO 9001:2008
- Transit protection using purpose-made plastic caps, covers and plugs
- Electronic receipt of drawings and documentation
- Development of drawings from simple layouts/schematics into working fabrication/installation drawings
- Listing of fire protection drawings for fabrication and installation purposes.

Pipework Engineering Services operates out of two locations, with a total of 21,000sq ft of production space at our Birmingham and Brierley Hill factories.

Our in-house facilities include:

- Plasma cutting equipment
- Welding machines
- Semi-automatic pipe cutting plant
- BSP Threading machines
- Threaded fitting 'make-on' machines
- Roll grooving machinery
- Material handling equipment
- Plotting and copying to A0 size
- Delivery vehicles
